TABLE OF CONTENTS

PAPER ID	PAPER TITLE WITH AUTHOR	PAGE NO
1	Thermal Management in EV Batteries: Enhancing Performance and Longevity *Abhiram Narukullapati*	1
2	Design of Super Lift-Luo dc-dc Converter for Electric Vehicle Applications *Anuhya gunda*	1
3	Performance Analysis of Proton Exchange Membrane Fuel Cell Fed Electric Vehicles *Eswaraiah Bongani and Balakrishna Kethineni*	2
4	Energy Harvesting for Medical Implants *Gnana Sahithi Vinnakota*	3
5	Energy management System of Micro Grids Utilising Vehicle-to-Grid and Grid to Vehicle Technology *N. Venkata Koteswara Rao and K. BalaKrishna*	3
6	An Evaluation of Hybrid Electric Vehicle Charging Station Using Suitable Power-Conditioning Device *Deepthi Parvathareddy*	4
7	Improving EV Charging Performance with SoC-Driven Power Adjustments *P. Jaya Sree, M. Manohara, D. Leela Rani, B.V. Sai Thrinath, S. Jareena Begum and B. Naga Sayana Reddy*	5
8	Grid-Integrated Solar PV Using Unified Power Quality Conditioner (SPV-UPQC) With Artificial Intelligence Techniques *Sravani Mangalapuri and Polamraju. V. S. Sobhan*	6
9	AI-Powered Optimization of Fault-Tolerant Quantum Circuits *Sai Janardhan Kamma and Dr.K. Rachananjali*	6
10	Field Level Crop Health Monitoring *Keerthana Bommaganti and Dr. Nelakuditi Usharani*	7
11	Integrating Digital Twin Technologies with IoT-Enabled DC Microgrids for Real-Time Monitoring and Performance Analysis of Electric Vehicles *Saleha Tabassum, A.R. Vijay Babu and Dharmendra Kumar Dheer*	8
12	Evolution of Radio Access Technologies in Enhanced Vehicular Adhoc Networks *Jahnavi Katragadda and Dr.B. Seetharamanjaneyulu*	9
13	Design of a Dual-Output High Voltage Gain DC/DC Converter for Electric Vehicle Charging *Kodumur Meesala Ravi Eswar, Nandini Nitin Pandhare, Mohit Verma, Chandan Thakur and P. Dhivya*	10

14	Securing Edge AI Devices with Efficient 8T-SRAM Computing-in Memory based SLIM Cipher S-box Design *Penumalli Koteswararao, TirumalaRao Kadiyam and Revathi Tanniru*	11
15	Enhancing Power Quality in Wind Energy Systems Integrated with Weak Grid Using ANN-PI Controller *Peram Venkata Ramana and K. Mercy Rosalina*	12
16	Artificial Intelligence-Controlled PV System Integrated with DC-DC Boost Converter and 11-Level Multilevel Inverter *Shaik. Shakeera and K. Rachananjali*	12
17	Blockchain-Based Federated Learning with Recurrent Networks for IIoT Intrusion Detection *M. Tejeswara Kumar and G.N.V.R. Vikram*	13
18	Smart Vehicle Control Systems for Uphill Driving: A MEMS-Based Approach *Dr.M. Manohara, Nagisetti Usharani, K. Supriya, Rupa Mahendra, M.N. Srikar and Surapareddy Naga Padmaja*	14
19	A New Fault Tolerant Multilevel Inverter for Electric Vehicle Applications *Chinthala Chaithanya, Palepogu Joel Dan Samuels, Koppala Munisai, Nagareddy Dheemanth Reddy, Tangasani Sai Krishna Reddy and Dr. Busireddy Hemanth Kumar*	15
20	An Efficient Multilevel Fault Tolerant Boost Inverter for Fuel Cell Applications *Pravallika Yarrappareddy, Sujatha Thummala, Yochana Etti, Santhosh Kurakula, Naveen Kumar Vemula and Dr. Busireddy Hemanth Kumar*	16
21	The Future of Wearable Technology: 5G, AI, and the Human Experience *Vijay Kumar Kavali*	17
22	Challenges in Cell Balancing Techniques used in Battery Management Systems for EV's/HEV's *Sridivya Vattem*	17
23	Novel Coupler Topology for the Improvement of Misalignment Tolerance in Wireless Power Transfer System for Vehicle to Vehicle Power Transfer *R. Venkatesan, A. Dominic Savio and R. Narayanamoorthi*	18
24	A High Stable and Low Leakage Variations of 9T-SRAM Cells for Low Power Applications *Guguloth Anjaneyulu*	19
25	Automatic Chess Timer *Jayanth Kousthubha Eswar Myla*	19
26	AI Techniquies in Smart Grids *M. Uma Maheswara Rao, N. Bharath Kumar and P. V. Subba Rao*	20
27	Emerging Trends in Approximate Multipliers *Shaik Aktahar and Dr.M. Sarada*	21

28	Emerging Trends in Data Converters *Tadigiri Aruna and Dr.Y. Ravi Sekhar*	21
29	Enhancing Paddy Leaf Diseases Detection-through Thermal Imaging *T. Nagamani and Dr. Usha Rani Nelakuditi*	22
30	Assessing Soil Nutrient and Moisture Variability near HVTLs *Thrisha Billu, Naveen Kumar Uppara, Vinay Yadav Doddi, Abhigna Nara, Dhanush Udugundla and Dr. Suresh Babu Daram*	23
31	Design and Implementation of a Life Saving Drone in Disaster Times *Mohammad Farooq Shaik, G. Samba Siva Rao and Durga Dinesh Vadupa*	24
32	Innovative Simulation Approaches for Dual-Gate Organic Thin-Film Transistor Design and Optimization *Meena Naga Raju, Member and M. Durga Prakash*	25
33	Analysis of Power System Security Under N-1 Conditions Using Intelligent Techniques *P. Venkatesh, N. Gnaneswari, K. Pavan Kumar, K. Prem Sagar, R. Madhan Mohan Reddy and S. Asha*	26
34	Rewiring of Ultra High Voltage Lines Without Using Hotline Techniques *Chakrapani Chokkapu*	27
35	Sensorless Water Pumping System Powered by a PMSM Motor Minimizing Power Electronic Devices *Lokeswari Bollu*	27
36	Revolutionizing Clean Energy and EV Integration: Advances in Smart Grids, Power Electronics, and Control Systems *Thallapally Chintu, Nandhimalla Chandu and G.N.V.S. Mani kanta*	28
37	Line Follower with Obstacle Avoiding Robot Car *Surendra Reddy Bontha*	29
38	Digital Twin based Predictive Maintenance and Real time Health Monitoring of Induction Motors Using Machine Learning and Adaptive Models *M. Bala Anil Kumar, V. Ganesh Babu and T. Sai Kumar*	29
39	Implementation of an FPGA Based Data Accelerator for Enhanced Read or Write Data Transfer Rates at Low Power Consumption *Akasam Sai Pavan and Dr. Musala Sarada*	30
40	Smart Energy Consumption Meter *Harish Sai Nagalla, P. Nani and Ravi*	31
41	Solar Powered Auto Irrigation System *Dr. K. Mercy Rosalina, Ali Tarig, Muhannad Ahmed and Sameer Alnour*	32
42	Integrating CNG and Electric Power [A Hybrid Approach to Sustainable Transportation] *Sumithpaladi*	32

43	Hardware Implementation for CNN Acceleration *Gadikota Chandana and Dr.P. Vijaya Lakshmi*	33
44	Sensor Based Approach for Monitoring and Detecting Sag in HT Transmission Lines *G. Hari Krishnan, M. Paramesh, M. Sai Kiran, N. Leela Raaman, P. Narendra and S. Raheem*	34
45	Fuzzy Logic-Based Active Output Filters for Harmonic Reduction in PV-Driven Six-Step Inverters *B.V. Sai Thrinath, Ganne Ananthulu, Islavath Jayanth Thulasi Raj Naik, D. Nagendra Babu, C. Sai Jwalitha and Vani Araveti*	35
46	Lightweight and Efficient Deep Neural Networks for Real-time PCB Defect Detection System *Vinod Kumar Ancha and Ramesh Vaddi*	36
47	A Multi-Boost Inverter for Solar and Wind Energy Systems *K. Arunyuvaraj and P.M. Venkatesh*	37
48	Implementation of Sensorless Technique of BLDC Motor in Two Wheeler EVs *Harika Naga Lakshmi Priya Koduru*	38
49	Enhancing Renewable Energy Integration: An Analysis of Bidirectional Converters and Multilevel Inverter Technologies *Shaik Allabakshu and P.M. Venkatesh*	38
50	Enhancing Power Quality Employing Artificial Intelligent Technique in Microgrid Systems Facilitates Dynamic Energy Trading *Jagadeesh Yerramala and Balakrishna Kethineni*	39
51	Analysis of PMSM Speed Control Strategies: Implications for EV Efficiency *Anki Reddy Bade and Srinivasa Rao Yarlagadda*	40
52	Design and Implementation of an IoT-Based Water Quality Monitoring System for Aquaculture *Mohammad Sunayn and Manne Bharathi*	41
