National Conference
on
MICROBIAL TECHNOLOGY FOR SUSTAINABLE DEVELOPMENT
(NCMITSUD)
1 & 2 February 2013

Editor
P.U. MAHALINGAM

Organized by

Department of Biology
The Gandhigram Rural Institute – Deemed University
(Re-Acccredited with ‘A’ Grade by NAAC)
Gandhigram – 624 302
Dindigul District, Tamil Nadu, India.

Publisher
FOREWORD

Microbial technology covers various aspects of microorganisms towards addressing some of the major challenges the world is facing, especially in the areas of sustainable agriculture, animal husbandry, human health and environment, energy, etc. Owing to its greater significance, newer and newer microorganisms are developed every day to address various fast emerging issues in the above areas. Though the benefits of such microbial technology are phenomenal, equally it has its own potential dangers, for example in the form of changes caused in the above areas due to the introduction of new microbes and also the creation of hybrid microbes which may provide negative contributions as well. However a lot of research is going on in India too. Hence it was felt necessary to gather the galaxy of Scientists working in this field in different provinces of India over common platform to share the experiences and distill their wisdom so as carve out the road map for future research. Over 100 researchers working in this field are congregating on 1st & 2nd, February, 2013 at Gandhigram Rural Institute – Deemed University. Dr.P.U.Mahalingam, Assistant Professor, from Department of Biology who has envisioned the said congregation namely the National Conference on “Microbial Technology for Sustainable Development” needs appreciation for organizing this and also bringing out a compendium on the deliberations.

I am confident that this conference will yield tangible inflow back into the research as well as benefits to the society.

(SM. RAMASAMY)
MESSAGE

Micro-organisms are the indispensable components of our ecosystems. Microorganisms were the first living organism on our planet. They influence and benefit the human society in countless ways. The modern biotechnology rests on the microbiological foundation. It has a great impact on agriculture, animal husbandry, environment, energy, therapeutics and many other fields. In the recent past, scientists have developed the microbial based technologies in the production of new crop varieties; vaccines for animal and human health; hormones to enhance milk and meat production; and so on.

This National Conference on “Microbial Technology and Sustainable Development” would provide a forum for the exchange and dissemination of new ideas among the researchers working in the field of microbial technology. The outcome of the conference would, I firmly believe, provide a strong base for further research. I appreciate the earnest efforts made by Dr.P.U.Mahalingam, Assistant Professor of Biology and the Organizing Secretary of the Conference in conducting a very timely conference with a current theme.

I wish the participants an intellectually rewarding and academically refreshing interaction during the conference. I wish the Organizing Secretary and his colleagues in the Department all the best.

(N. NARAYANASAMY)
The Gandhigram Rural Institute (GRI) is one of the 14 rural institutes founded nationwide in 1956. Started in a small way, the institute has blossomed into an institute of international repute in view of its contribution to integrated rural development.

The objective of the National Conference on Microbial Technology for Sustainable Development) being organized at GRI, Gandhigram is to provide a platform for the exchange and deliberation of new ideas among the researchers and academicians in the field of microbial technologies leading to sustainable development. The response of the researchers and academicians across the nation for this National Conference has been tremendous. This volume contains seven invited lecturers and 122 abstracts from various states of our country covering all the thrust areas of this National Conference. The research articles received have been grouped under four major headings, namely:

- Microbial technologies for sustainable agriculture, animal husbandry and human health;
- Microbial food & feed technology and therapeutics;
- Microbes – animal/plant interactions and Fungal biotechnology & composting technology; and
- Microbiology of waste management and bio-energy

The presentations being compiled in this volume is expected to be a resource material for the researchers and academicians working in this field of biology. I thank the authorities of GRI for their support for the successful conduct of NCMITSUD 2013. I am grateful to UGC, New Delhi and GRI, Gandhigram for providing funds for organizing this National Conference. My special thanks to the Staffs and Research Scholars, Department of Biology for all their support in organizing this conference.

P.U. MAHALINGAM
Organizing Committee

Chief - Patron

Dr. SM. Ramasamy, Vice-Chancellor, GRI

Patrons

Dr. N. Narayanasamy, Registrar, GRI
Dr. Thilagavathy Daniel, Professor of Biology, GRI
Dr. R. Kumuthakalavalli, Professor of Biology & Dean FROS, GRI

President

Dr. A. David Ravindran, Professor and Head, Dept. of Biology, GRI

Organizing Secretary

Dr. P.U. Mahalingam, Assistant Professor of Biology, GRI

Members

Dr. M.R. Rajan, Associate Professor of Biology, GRI
Dr. R. Ramasubbu, Assistant Professor of Biology, GRI
Dr. B. Sivasankari, Lecturer in Microbiology, GRI
Ms. L. Josephine Jenifa, Lecturer in Microbiology, GRI

12. Bio-Control of Pink Pigmented Facultative Methylotrophic Bacteria against Plant Pathogens of Bhendi, Onion

V. Janahiraman, Karthik Pandi and Chelvi Ramessh

T. Kuberen, A. Balamurugan, P. Nepolean, R. Vidhyapallavi, T. Beulah, J. Mareeswaran and R. Premkumar

14. Studies on the Potentials of Soil Pseudomonas sp Isolated from Paddy Rhizosphere

B. Sivasankari and R. Sobia

15. Arbuscular Mycorrhizae a Boon for Agriculture

Melaney Diana Priya, C. Angaleswari and P.U. Mahalingam

II MICROBIAL FOOD TECHNOLOGY, FEED TECHNOLOGY AND THERAPEUTICS

16. Isolation of Intestinal Microflora and its Probiotic Effect on Feed Utilization and Growth of Gold Fish Carassius auratus

M.R. Rajan and J. Jeya Christina Arockia Selvi

17. Strain Improvement by UV Radiations and Optimizing the Enzyme Activity of Extracellular Alpha Amylases Isolated from Bacillus subtilis

Navpreet Kaur and D. Raja

18. Development of Guava Based Shrikhand using Streptococcus thermophilus and Lactobacillus bulgaricus as Starter

D. Govindammal, M. Seethalakshmi and S. Thangaraj

19. Isolation and Characterization of Pseudomonas fluorescens Strains from the Foot Hills of Sathuragiri Hills for its Production of Antimicrobial Compounds against Plant Pathogens

J. Ebenezer Immauel

20. Therapeutic Benefits of Microbial Carotenoids

K. Shivalkar Yadav, H. Manjunatha, B. Ramachandra and R. Prabha

21. Production and Characterization of Alkaline Thermostable Protease from Deep Sea Marine Microorganism (Bacillus pumilus.)

Haris Parengal, A. David Ravindran, C.S. Arun and Shilpa Stephen

22. Zero-Cost, Ecofriendly Earthern Pot Cool Chamber for the Preservation of Fruits and Vegetables

L. Infancia, S. Vidhya and S. Shanthi
23. Application of *Streptococcus lactis* and *Streptococcus cremoris* in Low Calorie Strawberry Lassi  
*S. Thangaraj, M. Seethalakshmi and D. Govindammal*

24. Production of Alpha Amylase from *Aspergillus sp* under Solid-State Fermentation for Starch Processing  
*K. Kalaiarasi and R. Parvatham*

25. Proximate and Mineral Analysis of *Pleurotus florida* and *Calocybe indica* Edible Mushrooms  
*M. Prabu, T.P. Ajesh and R. Kumuthakalavalli*

*M. Melchi Manasan and A. Ashokkumar*

27. Preliminary Phytochemical Screening and Antibacterial Activity of Leaf and Rhizome Extracts of *Costus pictus* D.Don  
*M. Sabiha Sultana, Amzad Basha Kolar and Rahmath Ataaz*

28. Probiotics in Dairy Industry  
*A. Muthu Karthikeyan*

29. Antimicrobial Activity of Medicinal Plants against Gram Positive and Gram Negative Bacteria Isolated from Drinking Water of Bangalore City  
*Abdul Khayum, N. Nandini and Amzad Basha Kolar*

30. Bioprospecting of Bacteria Isolated from Kodaikanal Hill Soils  
*Rajangam Rajarajeshwari and Durai Saranavan*

31. Biosynthesis of Silver Nanoparticles using Aqueous Leaf Extracts of *Cassia auriculata* and their Antibacterial Activity  
*Poosali Hariharan Gunasekar and Gopal Suresh*

32. Antibacterial Activity and Phytochemical Screening of the Seed Extracts of *Lepidium sativum*  
*M. Poonkothai*

33. Isolation and Characterization of Actinomycetes from the Soil of Devathanam – A Foothill of Western Ghats  
*A. Astalakshmi, V. Thangapandian and K. Lingakumar*

34. Optimization of Cultural Conditions and Antibacterial Activity of Actinomycets Isolated from Shoreline Soil of Mahabalipuram, Tamil Nadu  
*Febina Bernice Sharon and Rachel Regi Daniel*
35. Screening the Effect of *Invitro* Antioxidant Property and *Invivo* Anti-Neoplastic and Anti-Inflammatory Activity of *Oscillatoria annae*  
*R. Sabitha, Rajavel and P. Malliga*

36. Bacteriocinogenic Activity of Lactic Acid Bacteria Isolated from Home-Made Curd  
*N. Devi Avaiyarasi and A. David Ravindran*

37. Development of New Microbial Consortia for Enhancing the Yield and Quality of Medicinal Coleus  
*V. Janahiraman, V. Karthik Pandi and Chelvi Ramessh*

38. Antibacterial Assay of *Solanaceae* species against *Helicobacter pylori*  
*M.Natarajan, N.Karthick and S. Umamahaeswari*

39. Bactericidal Activity of *Hugonia mystax* L.  
*S. Anandakumar and N. Karmegam*

40. Antibacterial Activity of *Lycosa pseudoannulata* (Bosenberg.) (*Araneae: Lycosidae*) Venom against Human Pathogens  
*S. Jeyaparvathi and S. Baskaran*

41. Analysis of Efficacy of Extraction Methods on Phycocyanin from *Spirulina platensis*  
*P. Prabakaran, M. Maheshwari, N. Ragavathi and A. David Ravindran*

42. Studies on Multidrug Resistant, ESBL Producing, Biofilm Forming Bacteria Isolated from Clinical Samples  
*Nagendrian Nandhakumar and Selvaraj Bharathi*

43. Strain Improvement of *Penicillium chrysogenum* by Classical Mutation  
*P. Vinodha., K. Kalaivani and N. Sivakumar*

44. Haematological Changes in the Freshwater Fish *Catla Catla* due to the Effect of Cold Stress  
*J. Vasanthi and S. Binukumari*

45. Nano-Robots: An Effective Tool for Medical Research  
*P. Ramalakshmi and R. Mariyammal*

46. Extraction of Pigments from the *Rhodotorula* species of Dairy Origin  
*K. Shivalkaryadav, H. Manjunatha, B. Ramachandra and R. Prabha*

47. Isolation and Extraction of Red Colored Pigment from Terrestrial *Streptomyces* sp and its Textile Applications  
*V. Manonmani*
48. Isolation and Identification of Lipase Producing Bacteria from used Cooking Oil
   S. Karthika, S. Karthikumar and Anant Achary

49. Antihelminth Activity of Cow Urine Extract of Azadirachta indica
   M. Ranjith Kumar, K. Rajapandian and P.U. Mahalingam

50. Sequence Analysis and Structure Prediction of Lipase From Pseudomonas fluorescens LP1
   S. Kanimozhi and K. Perinbam

51. In Vitro Methods for the Selection of Potential Probiotic Isolated from Commercial Dairy Product
   M. Rizwana Parveen Rani, T. Mangayarkarasi, N. Devi Avaiyarasi and A. David Ravindran

III MICROBES - ANIMAL/PLANT INTERACTIONS AND FUNGAL BIOTECHNOLOGY & COMPOSTING TECHNOLOGY

52. Utilization of Paddy Wastes as Carrier Materials for Starter Cultures of Efficient Cellulolytic Inoculum Designed for Rapid Composting
   Moses Kolet

53. Influence of Phosphate Solubilizing Bacteria on the Growth and Metabolism of Abelmoschus esculentus L. (Ladies Finger)
   S. Bagampriyal, K. Suresh, K. Yazhini Yadav and K. Krishnamoorthi

54. Role of Bioagents in Disease Management – A Review
   E. Rajalakshmi and M. Malligadevi

55. Performance of Phosphate Solubilizing Bacteria for Improving Growth and Yield of Maize (Zea mays L) in the Presence of Phosphorus Fertilizer
   K. Yazhiniyadav, K. Suresh, S. Bagampriyala and K. Krishnamorthi

56. Indole-3-Acetic Acid Production and Enhanced Plant Growth Promotion of Vigna unguiculata (L).Walp by Azotobacter sp
   M. Anandharaj and B. Sivasankari

57. Enrichment of Organic Carbon and Nitrogen using Microbes as a Source of Carbon Sequestration in Agricultural Lands
   J.S.I. Rajkumar, B. Nishanth, S. Meenakshi Sundaram and Thanga Tamil Vanan

58. Indole - 3 - Acetic Acid Production and Enhanced Plant Growth Promotion by Indigenous Bacterial species
   Kavikumar, J.S. Pradeep and B. Sivasankari
59. Effect of Different Organic Fertilizers on the Growth of *Amaranthus tristis*
   *K. Chitra Devi and P. Malliga*

60. Probiotic Turns Your Health: Its Quality and Antagonistic Effect on Pathogens
   *Aurvindo, Deepika, Thakur, Navpreet Kaur and D. Raja*

61. Effect of Liquid Seaweed Fertilizer of *Sargassum wightii* Grev. on the Growth
    and Biochemical Content of *Vigna unguiculata*
   *M. Fairaj and L. Josephine Jenifa*

62. Development of Plant Growth Promoting Rhizobacteria for Management of
    Bacterial Leaf Spot (*Xanthomonas betlicola*) and Foot Rot (*Phytophthora capsici*)
    of Betel Vine (*Piper Betel*)
   *K.S. Meenakumari, U. Sheeba, V.I. Soumya and C.S. Unnimol*

63. A Study on Biodegradation of Coir Pith using Microbial Inoculants and
    Earthworm, *Eudrilus eugeniae* Kinberg
   *Leishipem Ningshen and Thilagavathy Daniel*

64. Enhancing Nutritional Contents and Antioxidants Properties of Whole Grain
    Cereals for Human Health
   *R. Suresh*

65. Microbial Contaminants and Elimination Trails on Some Tissue Cultured Wild
    Impatiens
   *N. Sasi Kala, C. Divya And R. Ramasubbu*

66. Microbes and Human Health
   *D. Sabitha*

67. The Effect of Different Concentrations of Liquid Seaweed Fertilizer of *Ulva lactuca*
    on *Vigna unguiculata*
   *K. Sivasankari and L. Josephine Jenifa*

68. Impact of Phosphorus Solubilizing Bacteria (Phosphobacteria) in Enhancing the
    Yield and Yield Attributes of Maize Crop
   *M. Manimaran and T. Senthivel*

69. Effect of Humic Acid Extracted from Vermicompost on Root Elongation in
    Maize (*Zea mays*) Seedlings
   *J.A. John Paul, N. Karmegam and Thilagavathy Daniel*

70. Benefits and Recent Advantages of Vermicomposting Biotechnology for
    Organic Farming
   *Leishipem Ningshen and Thilagavathy Daniel*

114. Antimicrobial Activity and Preliminary Phytochemical Studies of the Herbal Plant *Trichopus zeylanicus*
*M.R. Chinju, S. Prabhu, M. Amuthan, S. Ramesh and S. Viswanathan*

115. Screening of Biosurfactant Producing Bacteria Isolated from an Oil Polluted Soil Collected from Automobile Workshop in Tirunelveli and its Characterization
*P. Yesu Thangam, D. Gomathi Lakshmi, S. Viswanathan and S. Ramesh*

116. Studies of Antimicrobial Activity and Characteristics of Bacteriocins Produced by *Lactobacillus* Strains Isolated from Colostrum of Domestic Animals
*P. Suba, G. Preethi, S. Viswanathan, S. Ramesh and M. Amuthan*

117. Evaluation of Microbial Quality in Street Vended Fruits
*R. Narasimhan, G. Karthikeyan, S. Viswanathan and S. Ramesh*
| 118. | Effect of Yeast Supplementation on Milk Yield and Composition of Crossbred Cows |
| A.Ramanathan, Venkata Narasimham and A.Muthu Karthikeyan |
| 130 |
| 119. | Cephalosporin Resistance Pattern and ESBL Production Analysis in Gram-Negative Pathogens Isolated from a Clinical Sample |
| S. Jency, G. Parameshwaran, S. Viswanathan, S. Ramesh and M. Amuthan |
| 131 |
| 120. | Isolation and Identification of Bio-Fertilizing Microorganisms from Soil Samples and Determination of Growth Condition in Chilly and Cluster Beans |
| S. Sinthyavathi, K. Chairman, M. Amuthan and S. Ramesh |
| 132 |
| 121. | Impact of Food Additives on the Growth of Human Gut Flora, Lactobacillus and Commercial Probiotics |
| 133 |
| 122. | Antibacterial Activity of Various Extracts of Leaf and Wood of Anisomeles malabarica |
| S.Suresh and M.Suriyavathana |
| 134 |
